THE MOST INNOVATIVE PRODUCTION LINE

Porcelanosa welcomes the most automated plant in the world for the production of large format sintered stone slabs, being pioneer in the international ceramic sector.

Innovative precision decoration technique that provides depth to the design and manages to go through the material.

Resolution of 600 dpi and an array of 9 colors never seen before.

Great diversity of textures, finishes and reliefs with 15mm incisions. - 3D Design.

Awarded as best new ceramic production plant by TecnAwards 2022, the automation and self-sufficiency of each process and the extensive protection and post-production of the material are the key points to declare this facility a technological pioneer in the sector.

With over 36,000 m², we find ourselves in the most modern facility in the world in terms of processing technology and environmental responsibility. A plant committed to the environment with self-supply energy and 100% reuse of the resources.

THE PERFECT SIZE WITH THE PERFECT THICKNESS

Crafted from the finest materials, our 800x2400 tiles embody a harmonious blend of durability and elegance. Every tile is showcasing the innate beauty of the material. Whether it's the rich warmth of natural stone, the sleek allure of porcelain, or the captivating textures of ceramic, our range offers an exquisite palette that speaks to your unique design aspirations.

The grand dimensions of our 800x2400 tiles provide an expansive canvas for creativity, enabling transformative applications across various spaces. From sprawling floors that exude opulence to striking feature walls that captivate attention, these tiles redefine versatility.

Our latest advancements encompass technologies that facilitate seamless installation, reducing time and effort while maintaining impeccable precision.

HIGHLIGHTING THE UNIQUENESS IN PUREST FORM

STAR PORCELANO
Advanced Materials. Advanced Looks.

TILES OF TOMORROW A PALETTE OF TIMELESS BEAUTY

In a world where trends come and go, true beauty remains eternal. Our tiles transcend fleeting fashions, offering a palette of timeless elegance that enriches spaces for generations to come.

The interplay of colors, from soft pastels to bold statements, is a testament to our commitment to preserving the allure of classic design while embracing contemporary sensibilities. As light dances upon our tiles, it reveals intricate details that highlight the inherent charm of each shade.

WORKING WITH THE VARIOUS VERSIONS OF ULTIMA15 COUNTERTOP

CUTTING WITH DIAMOND DISCS

Our products can be cut using diamond discs fitted onto the hand-held electrical grinding machine. The speed of Disc rotation must be high (>10000 RPM) and should have a low feed rate (< 1 m/min). It may be required to cool the disc with water. Recommended discs are the thin types generally used for cutting porcelain stoneware. The surface should be kept on a FLAT base while cutting without any gap underneath

DRILLING

You can use cutting discs fitted to battery-operated screwdrivers or angle grinders, electrical drills as an alternative.

INTERNAL CUT / L-SHAPED CUT

To get internal and L-shaped corners & to reduce the risk of breakage, round off the vertex of the internal corner using bits with a radius of at least 5mm. Then cut with diamond discs, be cautious to stop moving the cutting tool forward. To drill and cut using diamond discs, follow the instructions provided above.

- When using these tools:
- Cool the point being drilled with water
 - Don't put too much pressure and bear in mind the resistance of the type of laminated stoneware you are working on
 - If you are using tungsten bits, start drilling at a low speed
 - If you are using drills or screwdrivers, do not select hammering mode

EDGE-FINISHING

INSTRUCTIONS FOR MANUAL INSTALLATION

SINGLE LAYER METHOD

DOUBLE-LAYER METHOD

COMPRESSING THE TILE

CUTOUT DESIGN

The minimum gap between a cutout and the edge of the slab must be at least 2". The size recommends distances greater than 2" when the kitchen design allows as it makes the countertop firmer.

IMPORTANT

All cutout corners must have a minimum diameter of 1/4". Never leave 90° angles. We recommend radiuses of more than 1/4" when the kitchen design allows as it makes the countertop firmer.
